

The Max Buchner Research Foundation (a service of Dechema, Gesellschaft für Chemische Technik und Biotechnologie) awards travel grants for the presentation of scientific and technical research work at scientific forums, congresses, symposia, conferences and other specialist events in the fields of chemical engineering, process engineering, biotechnology and related research areas, especially if DECHEMA Gesellschaft für Chemische Technik und Biotechnologie e.V. is involved in the scientific organisation of the event.

The scholarships are intended to enable young scientists to participate in relevant events. In addition, the exchange with the community as well as the presentation of current, own research work should be promoted.

Researchers at universities and non-university research institutions are eligible to apply up to eight years after completing their doctorate. (Side note: There is no mention whether this applies to researchers worldwide or not, so if you are working at an institution outside Germany, you might want to get in touch with the contact person – name and contact details are provided on their website – to check whether you are eligible to apply.)

Applications are assessed and approved on a quarterly basis. The following deadlines apply for submission:

- 15 March of the year
- 15 June of the year
- 15 September of the year
- 10 December of the year
